

Introducing Waterproof's Revolutionary Silicone Seal System

Waterproof redefines drysuit diving comfort, care and performance.

Waterproof is pleased to announce the availability of its revolutionary silicone seal system.

Compatible with most commonly available wrist ring systems and drysuits, divers now have the opportunity to upgrade one of the most troublesome and costly parts of diving dry.

Waterproof's new wrist and neck seals far exceed current latex products and are sure to set the standard for all drysuit divers.

Seal System Features:

- Hypoallergenic medical grade silicone – no latex allergy
- 40% more stretch than latex seals
- Extreme durability – UV, Ozone and Chemical resistance
- Superior Tear Resistance
- Enhanced Comfort
- Ease of Donning/Doffing – no talc or powder necessary
- Easy replacement as required
- Compatible with SI Tech and most other ring systems
